**Editor’s Note**

It is truly a festive edition of APOS Newsletter with many joyful announcements from the Asia Pacific region.

Firstly, it is our pride and joy to congratulate Dr. Nikhilesh Vaid as the first APOS fellow to become the President-Elect of the World Federation of Orthodontists (WFO). He will be assuming his presidency after the 9th IOC at Yokohama in 2020.

The joyous bells continue to reign with the announcement of the “WFO Regional Award of Merit” recipients who are none other than the well-deserved Dr. Somchai Satravaha - Thailand (Central & East Asia), and Dr. Keki Mistry - India (Central & East Asia).

It is also my honour to host the Asian Pacific Orthodontic Society Executive Committee at the APOS Face-to-Face meeting during the Association of Orthodontists (Singapore) Congress (AOSC) in February 2019. My team has worked very hard to bring the most up-to-date orthodontic knowledge with world renowned speakers and exhibitors to all delegates. And we will do our very best to greet our guests at AOSC 2019 with our warm hospitality.

Being part of the editorial team at the APOS newsletter has been a wonderful ride for me in the last two years. I never fail to get a great sense of satisfaction when I receive positive feedback about our editorial work from our colleagues.

I am delighted to hand over the reins to Dr Sylvia Tan, who is taking over as Editor-in-Chief. Dr. Tan is the current continuing dental education chairperson for AOS 2017-2019. I have no doubt that the newsletter will continue to gain success in Dr Tan’s hands.

With a heavy heart, I would also like to end this note with my sincerest thanks to APOS Immediate Past President, Dr Bryce Lee, who is always there with his extra pair of eyes before each issue of newsletter is released; to APOS General Secretary, Dr Roberto Tan, who has helped me to collate articles from the APOS members; to all the writers who have contributed in every way, to the friends who have been there and most importantly, not forgetting our layout designer for every issue, Mr. Lim Yufan. Your presence and efforts have made this journey an unforgettable one!

I hope you will enjoy this festive December issue of the APOS newsletter, and don’t forget to sign up for the 12th APOC Yokohama 2020!

Wishing everyone Happy Holidays, and have an incredible 2019!

---

Dr. Seow Yian San
Editor-in-Chief and Assistant Treasurer
President’s Message

Since my assumption into office as the APOS president last March, I received invitations from our affiliate members to attend their annual meeting or international conferences held in their respective countries. The warm welcome and generous reception from the host societies/associations, together with the fraternal connection is what I am always thankful for. I look forward to building greater friendship with more affiliate societies/associations next year.

As you know, the 9th IOC will be held jointly with the 12th APOC in Yokohama in 2020. In late October, together with the APOS Office Bearers (OBs), I visited Japan through the invitation of Dr. Takashi Ono and Dr. Keiji Moriyama to attend the site visit inspection for the joint conference. I’ve learned that the JOS Organizing Committee has chosen a large, modern, multi-functional, and easily accessible convention complex staffed with experienced workers for the 2020 event. The preparation for the 2020 event is in steady progress as planned and I am very confident that we will have a successful IOC and APOC in 2020. I would like to express my gratitude to the Local Organizing Committee (LOC) under the leadership of Dr. Takashi Ono and Dr. Keiji Moriyama for their fantastic preparation and hard work.

In October, we are all saddened by the news that Dr. William (Bill) Proffit, a great friend of the APOS has passed away. As we all know, Dr. Proffit was a distinguished leader, motivator, and educator of orthodontics around the world and he had a great influence through his lectures and publications on many orthodontic professionals and learners in our Asian Pacific region. We appreciate his contribution to the orthodontic profession and his memory will be forever in our hearts.

I would also like to update you that two important members of the APOS OBs have signified their intention to leave their current position and responsibilities. They have made significant contribution to the APOS in their long service in our society. Dr. Seow Yian San, our assistant treasurer and editor-in-chief of APOS newsletter, did a great job in handling the two main responsibilities for the APOS. In February next year, Dr. Seow Yian San will step down as assistant treasurer and head for bigger appointment within the AOS. I appreciate very much everything she has done for APOS and I wish her a brilliant future.

Dr. Nikhilesh Vaid has worked for more than a decade as the Editor in Chief (EIC) of the APOS Trends in Orthodontics (the official journal of the
APOS) and he will resign as the EIC in 2020 to focus on his new job. Dr. Vaid was elected by the WFO executive committee during the EC meeting in Yokohama as the WFO President-Elect. He will assume position as the WFO President during the 9th IOC in 2020, and by that time we will have the first WFO president coming from the Asian Pacific region.

Let us send our congratulations to Dr. Vaid for his successful election and extend our grateful thanks for his astonishing contribution in making the APOS journal a publication with great relevance in the Orthodontic world. I believe Dr. Vaid will lead the WFO to a greater heights, which will be beneficial to the APOS and to the development of orthodontics in our region.

As the year is about to end, let me greet everyone a Merry Christmas and Happy New Year. I would also like to express my sincere gratitude to all our APOS members. Our society would not run smoothly, if it was not for the wonderful work and strong support from each one of you. I propose that we give a big round of applause for ourselves.

Thank you!

Best Regards,
Dr. Zhou Yanheng

The 77th Annual Meeting of the Japanese Orthodontic Society (JOS) was held successfully from 30 October to 1 November 2018, at the PACIFICO Yokohama convention complex in the port city of Yokohama, Japan, under the theme of “Towards a Bright Future in Orthodontics Together.” The 7th Joint Meeting of the Japanese Orthodontic Society and Korean Association of Orthodontists (KAO), held bi-annually, was also convened this year in conjunction with the JOS meeting.

Under clear autumn skies, more than 5,100 delegates attended, which broke the past record and was the largest ever turnout for a JOS Annual Meeting. This year, the organizers had increased the number of session halls to three from the usual two, expecting an increase in delegates. Nine international and 50 national speakers shared their knowledge and experience with the participants. During the meeting, 385 papers were presented, of which 18 were delivered in oral sessions. The exhibition featured 77 exhibitors, which was also a new record, showcasing the latest developments in orthodontics-related devices, solutions, publications and more.

Booths for World Federation of Orthodontists, Asian Pacific Orthodontic Society, American Association of Orthodontists, International Orthodontic Congress (IOC), and KAO were also arranged in the National Convention Hall of Yokohama, to enable promotion of various key activities. PACIFICO Yokohama will also be the venue for the joint 9th IOC, 12th Asian Pacific Orthodontic Congress, and 79th JOS annual meeting in 2020. For more information on the event, please visit www.wfo2020yokohama.org.
Site Visit in Preparation for 12th APOC in Conjunction with 9th IOC

Professor Takashi Ono, Congress Chairman

During the 77th Annual Meeting of the Japanese Orthodontic Society (JOS), from 27 October to 1 November 2018, members of the APOS and WFO Executive Committees came to Yokohama to conduct a site visit of the venues for the upcoming 12th APOC and 9th IOC scheduled for October 2020.

Prof. Keiji Moriyama, President of the JOS and I, as well as members of the IOC 2020 Local Organizing Committee, warmly welcomed the APOS Executive Committee members.

The following APOS Executive Committee members attended:
- Dr. Yanheng Zhou (COS), President of the APOS
- Dr. Eric Liou (TAO), Vice President of the APOS
- Dr. Roberto Tan (APO), Secretary-General of the APOS
- Dr. W. M Senadeera (SLOS), Treasurer of the APOS
- Dr. Bryce Lee (AOS), Immediate Past President of the APOS
- Dr. Nikhilesh Vaid (IOS), APOS Trends Editor-in-Chief
- Dr. Seow Yian San (AOS), Assistant Treasurer

Dr. Zhou was also featured as a speaker in the JOS Special International Session – “World Trends in Orthodontics.”

Both APOS and WFO members took tours led by the respective JOS members involved in the work-
ing groups for the 2020 congress preparations. PACIFICO Yokohama, the venue for the 9th IOC and 12th APOC is located in the historical port city of Yokohama, situated right on Tokyo Bay that extends out to the Pacific Ocean.

The city has long prospered as an international port city trading with foreign countries that opened to the world in 1859. Since that time, Yokohama has been vigorously absorbing new cultures and information from other countries, and developed a reputation as the source for new information from abroad that was disseminated around Japan, hence its nickname as the birthplace of Japan’s modern culture.

Stunning views of the harbor can be seen from the Conference Center meeting rooms and the National Convention Hall of Yokohama, the venue for the Opening Ceremony and IOC key plenary sessions.

The members also inspected various meeting rooms to be utilized for lecture sessions. The exhibition halls will house the exhibition and poster presentations in two of the facility’s halls. In addition, APOS members visited several candidate venues for social programmes.

I am confident that delegates will really enjoy the open, resort-like atmosphere and the outdoor spaces of this convention complex.

After a full day of venue inspections, we invited everyone to a special get-together dinner for the APOS and WFO Executive Committee members, at a traditional Japanese restaurant, which turned out to be a very lively evening and we forged closer bonds with each other.

On 31 October, the APOS Office Bearers meeting was held at PACIFICO Yokohama, where I presented a progress report on the preparations for the 12th APOC and had valued discussion on various issues.

Yokohama is only a 30-minute journey by train from Tokyo, with a variety of convenient methods of access from international airports.

Yokohama offers a wide range of diverse cuisines, including healthy “WASHOKU” Japanese cuisine, delicious fresh seafood, and world-class international cuisine, including Chinese, Italian, French and Indian restaurants.

October is one of the best months to visit Japan, with crisp, dry air and clear skies.

Please save the dates of 4-7 October 2020! Yokohama’s cosmopolitan atmosphere and your JOS colleagues await you at the 12th APOC and 9th IOC. It will be a wonderful opportunity to gain the latest finds in our field and experience for yourself the world-renowned Japanese hospitality!
Interview with Dr. Nikhilesh Vaid, WFO President-Elect

Dr. Seow Yian San, Assistant Treasurer and Editor-in-Chief for APOS Newsletter

I would like to congratulate Dr. Nihiklesh Vaid on being elected as the next president of the World Federation of Orthodontists (WFO).

Q: Congratulations on being the first APOS fellow to be the President-Elect of WFO.
A: Thank you Yian San. It is an enormous responsibility as I step into the shoes of some very illustrious giants of our profession. I’m humbled by the confidence posed by the WFO EC.

Tell us a bit about yourself.
The Asian Pacific Orthodontic Society (APOS) family has known me for some time now. I was born and raised in Mumbai, India. I did my dental training in Pune, Western India, and my graduate training in Mysore in South India. I’ve been pursuing orthodontic practice, academics, and research. I’ve also been actively involved in leadership and professional advocacy for the Indian Orthodontic Society, APOS, and now the WFO.

What do you think are the strengths and potentials of WFO at the moment?
The WFO is the largest umbrella of the orthodontic profession globally. It symbolises the collective aspirations of the speciality in all parts of the globe. The outreach of the WFO is probably more than any other global dental speciality association in the world. It has the potential to positively impact specialists, and care seekers alike.

What plans do you have in store for the orthodontic community during your term of office?
The primary thrust of my presidency will be “en-
hancing the value of membership” to all existing fellows. We will strive to create platforms for greater interaction with and amongst fellows - specifically with respect to educational resources and benchmarking quality of clinical care rendered.

**What are the things or who are the people who inspire you?**
That’s a tough one. I’ve been inspired by many people who have touched my life, and I carry a part of each of them within me. I can’t even thank them today as each of these sources of inspiration reside within me. Hard work, integrity and the ‘never say die’ spirit are the core values that drive me; the importance of each of these values have been emphasised by all my role models.

**Do you think the APOS is an integral part of the WFO - and vice versa?**
Certainly. The APOS span’s a region that contributes 40 percent to the composition of the WFO EC currently, and a proportional number of fellows to the Federation. With respect to the vice versa, APOS affiliates are all WFO affiliate societies, and have enthusiastically participated in all WFO activities. The magnitude and scale in which the “World Orthodontic Health Day- A WFO initiative” is celebrated in the Asia Pacific region, by every affiliate of the APOS who bears testimony to how our two organisations have always synergistically strived for the cause of our speciality!

**What part do you see the APOS and its affiliate societies have to play in the WFO and how can we contribute to world orthodontics?**
The sun of orthodontic excellence and innovation proverbially “rises in the east” today! A lot of APOS fellows are the “creme de la creme’ of our specialty, globally. Be it in published literature, or podiums- orthodontists from the region have made a mark! The Asian Pacific orthodontic region has grown in size and stature, as well as its contributions to the orthodontic world. Every orthodontist who renders services to the profession, and patients that he/she treats - contributes to world orthodontics, by augmenting the “brand value” of orthodontics.

**How to you find time to manage your work, family and other commitments?**
Growing up, I used to visit my dad’s office, staring at the message placed on his desk which read “The best managing director is always free.” This was the best lesson and goal I learnt about time management- the ability to free up one’s time to do everything one is passionate about. Balance is the key. I’m still not where I should be on time management, but hopefully I will get there one day!
APOS Office Bearers at Work in Yokohama

*Dr. Roberto Tan, Secretary General*

The preparation for the 12th APOC is in full swing for the joint meeting with the 9th International Orthodontic Conference (IOC) and 79th Annual Meeting of the Japanese Orthodontic Society (JOS) to be hosted by the Japanese Orthodontic Society (JOS) scheduled on October 4-7, 2020. The President of the JOS Prof. Keiji Moriyama and the Chairman of the 9th IOC Professor Takashi Ono welcomed the APOS Office Bearers headed by President Professor Yanheng Zhou together with Drs. Eric Liou (VP), WM Senadeera (Treasurer), Roberto Tan (Secretary General) Bryce Lee (IPP), Nikhilesh Vaid (EIC APOS Journal) and Seow Yian San (Assistant Treasurer).

The APOS OBs had the privilege to have a glimpse of what to expect at the world’s biggest Orthodontic Conference in Yokohama, Japan in 2020. The weather was perfect for the site visit on 29 October, 2018; it was sunny with clear blue skies. We could actually feel the autumn breeze as we walked along the conference site situated at the coastal area of Tokyo Bay overlooking the beautiful scenic view of the harbour.

Dr. Isao Saito, Vice Chairman of the 9th IOC led us during the site inspection. First on the agenda was the visit to the Pacifico Yokohama, the official venue for the conference comprising of three buildings adjacent to each other; the
National Convention Hall, the Conference Center and the Exhibit Hall. It has an access to the Intercontinental Yokohama Grand Hotel, one of the official accredited hotels for the conference. We also visited possible venues for the different Social events for the Gala Night, International Reception and President Reception.

The site visit inspection coincided with the 77th Annual meeting of the JOS with over 5,100 delegates. Congratulations to Professor Kazuhito Arai, Chairman of the 77th Annual Meeting of the JOS for holding a successful conference. The APOS OBs extend its appreciation for the booth accorded to the APOS at the exhibition area to promote the different APOS activities such as the APOS Journal (APOS Trends in Orthodontics) and APOS Newsletter.

The WFO Executive Committee members
headed by the WFO President Allan Thom were also doing the WFO site visit inspection led by a different team from the JOS organizing committee members. During the executive meeting of the WFO Committee Members last October 30, 2018, Dr. Nikhilesh Vaid was elected as the WFO President for 2020-2025. It was a great moment for the APOS as the running of the WFO affairs will be entrusted to an APOS Fellow. Dr. Vaid was the past President of the APOS and currently the Editor-in-Chief of the APOS Journal.

On 31 October, 2018, the APOS OBs had their meeting and they were joined by Prof. Keiji Moriyama and Prof. Takashi Ono to discuss, APOS issues and concerns arising from the site visit inspection. All went well with the exchange of ideas and suggestions between the OBs and the Organizing Chair.

The JOS organizing team must have coincided the site inspection with the 77th JOS Annual Meeting for us to have a preview of what to expect in 2020. They have done a fantastic preparation for this site visit inspection for the 9th IOC as well as for the Welcome Reception, the Sightseeing Tours around Tokyo, the 77th JOS Annual Meeting Banquet and Gala Night. Amidst all the hard work and excellent preparations, what is remarkable is the hospitality, sincerity and generosity of every JOS member we met during this visit. Each member we encountered find time to talk about their association, country and culture. You can feel the respect accorded to you as they stood up straight in front of you, feet together and hands on their sides as they bow their heads to greet and bid goodbye.

We have less than two years to go before the 9th IOC (12th APOC & 79th JOS Annual Meeting) and the APOS OBs have only one impression after the site visit inspection, “this conference will be a big success”. Let us all support this conference, this is our conference, this is the APOS official Conference.

“Arigatou gozaimasu JOS.”
The Thai Association of Orthodontists (ThaAO) held its 2nd Annual Meeting on 29-30 November 2018, at Khumkham International Convention Center, Chiangmai. This marked the first time ThaAO held a scientific conference outside Bangkok. The theme of this conference is ‘Contemporary Orthodontics.’ Prof. Ravindra Nanda was the keynote speaker, and gave a talk entitled “Evidence-based Contemporary Orthodontics: Biomechanics, TADs, Aligners and Acceleration.”

The total number of participants was nearly 500, double of what was expected. 27 dental supplier companies joined the trade exhibition.

On the night of 29th November, ThaAO hosted the reception in a “Lanna” (northern thai) atmosphere. Committee members, speakers, guests and participants were dressed up in traditional Thai costume. Dr. Bryce Lee (APOS Immediate Past President), Dr. Arthur Lim, Dr. Geraldine Lee (AOS ECM) also joined the events. The ThaAO awarded Prof. Ravindra Nanda an Honorary Membership and also had given a Lifetime Achievement Award to Clin. Prof. Virush Pattanaporn from Chiangmai University.

On 30 November, there was a morning Yoga session instructed by Asst. Prof. Pintu-on Chatarawaratit and Dr. Peaga Jarungidanan. Later in the day, prominent lecturers (namely Clin. Prof. Virush Pattanaporn, Prof. Dhirawat Jotikasthira, Assoc. Prof. Chairat Chaloemratrote, Asst. Prof. Pintu-on Chantarawaratit and Asst. Prof. Supakit Peanchitlertkajorn) gave outstanding lectures.

On 1 December 2018, ThaAO held a recreational activity for multi-handicapped children at Sri-sangwan School in Chiangmai and threw a feast for the kids.
AOS looks forward to hosting APOS Face-to-Face Meeting 2019

Dr. Bryce Lee, APOS Immediate Past President, and Dr. Mohan Senathirajah, AOS President

On 24 February 2019, the Association of Orthodontists (Singapore) (AOS) will be the host for the Annual General Meeting of the Asian Pacific Orthodontic Society’s Executive Committee. This will be held in conjunction with the 2019 Association of Orthodontists (Singapore) Congress (AOSC).

The 2019 AOSC will run from the 22 to 24 of February with pre and post congress lectures as well. A biennial event, we in the AOS have always intended for it to be the “Jewel” of Orthodontic events in the region. This time round, being hosts for the APOS ECs, the organizing committee, headed by the ever-capable Dr. Seow Yian San, has spared no efforts to ensure a very enriching experience for all. The venue for both the congress and AGM will be at the Marina Bay Sands, Singapore.

We, the AOS, eagerly await to welcome our guests from the region, and beyond, to our shores for the event. As a regional event, we recognize that delegates would have come from many miles away. We intend to do our level best to provide a quality-driven scientific programme and show our warm hospitality to all delegates. The organizing committee has also planned the delegates’ reception at the world's largest SEA Aquarium. The event venue will exclusively be opened to participants only. The ever-popular morning run around the Gardens by the Bay will be another high point of the social programme.

We are also honoured to have with us Dr. Allan Thom (President, World Federation of Orthodontists), Dr. Zhou Yanheng (President, Asian Pacific Orthodontic Society) and our very own Dr. Chng Chai Kiat (Chief Dental Officer, Singapore), to grace the event.

We look forward to seeing you in Singapore.

Please visit https://aoscongress.com for more information.
Welcoming IrAO as New ECM TO Asian Pacific Orthodontic Society

Dr. Hooman Zarnegar,
IrAO, ECM

As an Iranian Orthodontist, I had the honor of attending the 11th APOC, held in Boracay Island and the opportunity to join other respectable guests of orthodontists’ great family from different countries and enjoy the attendance at APOC, listen to speakers from all over the world, introduce my country with well-known specialists of this discipline to other attendees and exchange ideas with them.

It was both an unforgettable visit to the very beautiful island of the Philippines and also an honor to represent my country, namely Iran which was officially announced as the 19th affiliate member in APOS. The hospitality of APOS organisers and friendly treatment of ECMs was so impressive that I felt being an old member of APOS great family, not a newcomer. It was also my pleasure having met Dr. Allan R. Thom, the President of WFO.

Due to the sincere collaboration of the President of APOS, Dr. Zhou Yanheng, immediate past president, Dr. Bryce Lee, the Secretary General,
Dr. Roberto Tan and also Dr. Nikhilesh Vaid, as well as the ECMs, Iranian Association of Orthodontists (IrAO) was approved as a member country of APOS as it was entitled to be after a 40-year history of valuable experience and effort in this discipline.

Iran, with a population of about 80 million with an ancient civilization and a rich culture enjoys almost 55 dentistry faculties. IrAO, consists of more than 600 orthodontists, 235 of whom teach in different dental faculties as assistant, associate or full professors. At present about 155 residents are studying orthodontics. IrAO has held 16 annual International congresses, scientific symposiums as well as 15 seasonal scientific gatherings. The first group of Iranian orthodontists who brought orthodontics to Iran started this field in 1960s.

Known as the father of modern orthodontics in Iran, Dr. Aliakbar Bahreman, was the founder and the first president of IrAO in 1978. He has dedicated over 50 years of his life performing orthodontics. He received his D.D.S in Tehran University of Medical Sciences in 1962. He received Certificate of General Dentistry and Pediatrics (1964) and Certificate of Orthodontics (1966) at University of Rochester (New York) and completed MS at University of Rochester (New York, 1967). Dr. Bahreman received post-doctoral Internship training and residency in Orthodontics at Eastman Dental School.

He has gotten many awards, including the latest one in 2016 that he was granted Director Award, Eastman Institute for Oral Health which was sponsored by EIOH at University of Rochester; and also Gold pin for 50 years dedication to orthodontic science which was sponsored by American Association of Orthodontics at USA.

Dr. Bahreman is the author of the brilliant book
titled “Early Age Orthodontics” which was translated to four different languages and is taught in many universities around the world. In order to appreciate for his efforts in this area of knowledge, in 2017, the immediate past president of IrAO, Dr. Mehdi Kashani, decided to grant an award as “Dr. Bahreman Award” to the best orthodontic researcher in its annual congresses.

As a new member of the great family of APOS, IrAO is proud to invite all respected orthodontists in forthcoming IrAO Congress to be held in November 2019 in Tehran, Iran.

Please visit www.iao.ir for more information about our association, activities, achievements as well as selected articles about Iran and its many attractions for tourists.
